Experience

Work - Hollard Insurance Ghana

Nov 2025 – Nov 2026

National Service - IT Department

Accra, Ghana

- Providing hands-on technical support in a professional insurance IT environment.
- Assisting in the maintenance and troubleshooting of internal systems and network.
- Supporting day-to-day IT operations such as fixing laptops/Desktop problems, replacing faulty hardware, installing operating systems, configuring printers and support remote workers and contributing to efficiency improvements.
- Gaining practical exposure to enterprise-level software and infrastructure.

Work - Ghana Post

Sep 2024 – Oct 2024

Internship - IT Department

Accra, Ghana

- Assisted in troubleshooting and maintaining computer systems, printers, and network devices to ensure smooth daily operations.
- Provided technical support to staff by resolving basic hardware and software issues.
- Assisted in data entry, document management, and maintaining accurate records within the organization's information systems.
- Supported the installation, configuration, and maintenance of office applications, email systems, and internet connectivity services.

Education

Jan 2021 – November 2025

Ghana Communication Technology University (GCTU)

Accra, Ghana

- Studied core IT disciplines including networking, databases, and software development.
- Completed coursework in web development, Java programming, and system design.
- Developed problem-solving skills through practical project work and group assignments.
- Graduated with a well-rounded foundation in IT principles and applications.

Independent Learning

2025

Cybersecurity Self-Study

Accra, Ghana

- Actively exploring ethical hacking concepts, network security, and vulnerability assessment.
- Practicing in free lab environments to simulate real-world security scenarios.
- Building knowledge toward professional cybersecurity certifications.
- Graduated with a well-rounded foundation in IT principles and applications.

Projects

Personal Portfolio Website | *Next.js, TypeScript, Tailwind CSS*

January 2026

- Designed a modern, responsive portfolio built with Next.js and Tailwind CSS, featuring dark/light mode, smooth animations, and a cybersecurity-inspired design aesthetic.

Smoke and Fire Detection System | *ESP32, Sensors, C/C++ (Arduino IDE)*

November 2025

- Developed an IoT-based Smoke and Fire Detection System using ESP32, MQ-2, flame, and temperature sensors to provide real-time monitoring and alerts through Wi-Fi connectivity, enhancing early fire detection and safety measures.

Network Security Research | *Networking, Security, Linux*

November 2025

- Self-directed study project exploring common network vulnerabilities, basic penetration testing concepts, and security hardening techniques using free lab environments.

IT Helpdesk Tracker | *HTML, CSS, JavaScript*

October 2026

- Created a simple web-based ticket tracking tool designed during National Service to help the IT team at Hollard Insurance log and resolve internal support requests efficiently.
